Aspiring web developer focused on crafting responsive and intuitive digital solutions. Meticulous in problem-solving, troubleshooting and dedicated in attention to detail. Bringing adaptability, strong analytical abilities and effective time management to collaborative teams. Eager to contribute and grow in dynamic web development.

PERSONAL PROJECTS

Turf Booking System

React, Mongo DB, Express js, Node js

Features

- Developed an online turf booking system with **React** for the front end and **Node.js, Express, and MongoDB** for the back end.
- Utilized **Tailwind CSS** for styling the user interface, enabling rapid and responsive design
- Implemented **Redux** for state management, ensuring a centralized way to manage application state
- Utilized **JWT** for authentication and implemented robust form validation.

Chat Web Application

React JS, MongoDB, Express JS, Node JS

Features

- Developed a dynamic chat web application featuring both one-to-one and group chat functionalities.
- Utilized **Material-UI** as the UI framework, offering a set of pre-designed React components based on Google's Material Design.
- Ensured robust authentication and authorization using **JWT**, incorporating **bcrypt.js** for password encryption to enhance security measures.
- Utilized **Socket.io** for real-time communication and **Context API** for efficient state management.

Weather Application

React JS

Features

- Developed a weather application using React for real-time weather updates and forecasts.
- Utilized **Material-UI** to create a responsive and visually appealing user interface.
- Utilized the OpenWeather API to fetch real-time weather data.

CERTIFICATES

JavaScript Intermediate (10/2023)

- Solo Learn

Mongo DB (11/2023)

- Great Learning
